Figure 2

Many non-profit organizations have begun to operate and manage multiple charter schools—often across different states. Non-profit EMOs run 13 percent of all charter schools. This chart shows the largest for-profit and non-profit EMOs, which together run approximately 10 percent of all charter schools, enrolling 209,519 students.

Note: NAPCS makes a distinction between nonprofit EMOs, which they call Charter Management Organizations, and for profit, Education Management Organizations. CMOs tend to have smaller enrollments than EMOs (notice there are only two of them on the above list.) One of the other best-known nonprofit EMOs is Green Dot, which only had 15 schools enrolling 5,622 students in Los Angeles, CA in the 2008-09 school year.
